- Stable supporting structure made of aluminum profiles (L.5754) press-bent from sheet metal and/or shaped extrusions and welded at the joints to form a self-supporting, expandable shelter.
- Standard lifting by crane over ISO corner blocks or by forklift.
- Additional option for attaching wheels to the included leveling supports, suitable for concrete floors. (Available upon request)
- Expandable through a self-supporting and perfectly sealed “drawer” system with easy manual opening from the main body.
- Step-free floor covering made of non-slip rubber on a waterproof, multi-layered wooden base. Easy cleaning.
- The walls are made of sandwich panels, double 1mm thick aluminum sheet and 40mm polystyrene insulation.
- Entrance door with panic bar inside, 4 sliding windows (one on each end of the two expandable bodies) equipped with blackout curtains. Made from aluminum profiles with polycarbonate glazing.
- Painting and finishing in accordance with the intended use and the required standard.
- Max. overall dimensions of the closed monobloc (in mm):  
L.2991xW.2438xH.2591. In open operating position: L.2991xW.4200xH.2591.
- Total weight approx. 1,500 kg including equipment.

- Power supply via external 230V network using a CEE plug.
- Internal electrical panel for external discharges and safety devices in accordance with current regulations.
- Evenly distributed LED lighting and emergency lighting in the entrance area.
- Distribution of sockets and network sockets at all workstations.
- Basic equipment of the module:
  - 2 wall folding tables measuring 500x1570xH.730mm, for each long side of the two extendable side elements.
  - 1 folding table measuring 1200x800xH.730mm, with foldable substructure.
  - 8 stacking chairs model Dattilo with steel frame and fabric seats, other models available on request.
  - 4 whiteboards measuring approx. 600 x 800mm, positioned on the expandable side walls.
  - 55 Inch monitor.
- Monoblock inverter summer/winter air conditioner, 12 Hp (10,500 BTU/h) with wall air inlets.
- Rack cabinet with 6 U, mounted on the entrance wall, with access and branches for external networks.
- Grounding system with prefabricated connection and corresponding cable with ground spike.
- Commissioning: in approx. 15 minutes, with trained staff.
- Suitable for operation by at least 8 personnel.
